ARCHIVE DECISION-EPA REGION VII

Site: MEXICO FMGP  
ID #: MOSFN0703558  
Break: 1.0  
Other: 4/12/07

SITE NAME: Mexico FMGP EPA ID #: MOSFN0703558 SS ID #: \_\_\_\_\_

Alias Site Names: \_\_\_\_\_

City: Mexico State: Missouri County or Parish: Audrain Zip Code: 65265

**DECISION CHECKLIST:**

No further Superfund interest exists at the site based upon the following:

**All CERCLIS site work has been completed.**

{site assessment, RI/FS, RD, RA, O&M, all monitoring, closeout report, 5-yr review, NPL deletion, removal(s)}:

YES ☒ NO ☐ N/A ☐

**All enforcement actions have been completed.**

{PRP has complied with all aspects of enforcement document(s), all orders and/or consent decrees have been closed out}:

YES ☐ NO ☐ N/A ☒

**All cost recovery actions have been completed.**

{final billing sent & collected, referral completed, DD completed}:

YES ☐ NO ☐ N/A ☒

**All existing monitoring wells closed in accordance with state regulations.**

Date of final well closure: \_\_\_\_\_

YES ☐ NO ☐ N/A ☒

*If any of the above questions have a no response, site does not qualify for archival.*

**DISCUSSION/RATIONALE FOR ARCHIVAL:**

The Mexico Former Manufactured Gas Plant (FMGP) site is in a mixed residential/commercial area to the northeast of the intersection of South Western and High Streets in Mexico, Audrain County, Missouri. From about 1885 to about 1941, the site operated as a manufactured gas plant. Currently, the property is a fenced storage area and active electrical substation owned by the electrical utility company, Ameren UE. The site was discovered by the Missouri Department of Natural Resources (MDNR) in an effort to identify FMGPs, and was recommended for further action to evaluate potential hazards to human health and the environment.

In December 1999, MDNR conducted a Site Screening. Soil samples collected at the site contained polynuclear aromatic hydrocarbons (PAH); therefore, additional soil sampling was recommended. In August 2000, MDNR conducted a Preliminary Assessment/Removal Site Evaluation (PA/RSE) that included soil sampling. The PA/RSE determined that low PAH levels present in some subsurface soils; however, those concentrations were "not expected to cause adverse health effects for the surrounding population, if exposed." Additionally, those soils were at least 3.5 feet below ground surface and were unlikely to be disturbed. No releases to the groundwater were suspected at the site.

The U.S. Environmental Protection Agency (EPA) designated No Further Remedial Action Planned (NFRAP) status to the site based upon the findings of the PA/RSE. No known monitoring wells were installed under the authority of the Comprehensive Environmental Response, Compensation and Liability Act /Superfund Amendments and Reauthorization Act (CERCLA/SARA). No further response under CERCLA/SARA is required. The site has been NFRAPed and archiving is appropriate.
